This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Prefatory Note

In addition to the Alumni Associations of the separate schools, there was organized in 1902 the General Alumni Society of New York University. By provision of its By-Laws (Article I., Section 1), "Any graduate of any department or any matriculate of a class which has graduated and who has left New York University in good standing may, upon payment of a subscription to the Society, become a member. Any one not a graduate or a matriculate, who is or has been a member of the Council or of the teaching force of New York University, or any one holding an honorary degree from New York University may become a member of this Society, but may not hold office or vote at any meeting thereof."

In partial fulfilment of one of its objects, "the maintenance of a list of the names and addresses of all matriculates of the University," and in commemoration of the Semisesquicentennial of the University in 1905, the General Alumni Society has undertaken to publish a General Alumni Catalogue of New York University.

It is the plan of the catalogue to provide a complete list of all who have received degrees from the University and of all officers of administration and instruction; to give under the several names condensed biographies; and to add, in case of the deceased, the date and place of death, and, in case of the living, the present address.

The names of the Alumni have been grouped in classes under the various schools of the University.

The present volume is to be followed by another containing the names of the Alumni of the Schools at Washington Square (Law, Graduate, Pedagogy, Commerce), together with the

Veterinary College; and that by a third volume, under the editorial supervision of Dr. Egbert Le Fevre, secretary of the General Alumni Society, containing the names of the Alumni of the Medical School.

In the preparation of the present volume, material has been gathered by means of circular letters, enclosing blanks for data, sent directly to all Alumni whom it was possible to reach. Such letters have been followed up by cards urging that the requested information be sent, and by a large amount of personal correspondence. In addition to this direct source of information, material has been gathered in ways less immediate. The excellent Biographical Catalogue, published by the Alumni Association of the College in 1894, has supplied a large amount of data. The archives of the University, the catalogues of the various College fraternities represented at New York University, the annual, quarterly, and weekly publications of the students, the catalogues of other academical institutions, general and annual, the year-books of religious denominations, the standard encyclopedias of biography, Who's Who in America, Who's Who in New York, and many other sources, have been at hand for constant reference.

The arrangement of material under each name has taken the following order:

Occupation.

Degrees received from New York University and other institutions.

Parentage and birth.

Preparation for New York University.

College record and honors.

Record since graduation.

Honors received and membership in societies.

Publications.

Marriage and children.

Relatives in New York University.

Address, if living, or date and place of death if deceased.

The editor would welcome additional information under the

above heads which has not been included in the present volume, but may be of service to those having in charge a subsequent edition of the catalogue.

Thanks are due to many of the Alumni, who have contributed suggestions and information tending to make the work more complete. Mr. James Abbott, of the Class of '83, Treasurer of the General Alumni Society, has served the Society as Publication Committee. His familiarity with the processes which intervene between completed manuscript and a bound volume has greatly facilitated the progress of the Catalogue through the press.

It is assumed that errors will appear in spite of the most painstaking care to avoid them. It is also admitted that most of the omissions in such a compilation can be filled up if sufficient time is allotted to the work. It is believed, however, that the claim of further research for the sake of completeness at length must yield to the claim that less perfect results be given out for general use.

HENRY M. BROWN, '86,
Editor.

Faculty of the School of Applied Science

NOTE. Beginning with 1853, Prof. Bull offered instruction in civil engineering. The School of Engineering and Architecture was opened in 1856. The degree of C. E. was first conferred in 1863. In 1856 the School of Analytical and Practical Chemistry was opened. Courses in this school led to the degrees of B. S., Ph. B., and Ph. D. for matriculants who met additional academic requirements. In 1899 the School of Engineering was expanded into the School of Applied Science.

From 1856 to 1899 members of the College Faculty taught students of applied science. The list which follows immediately includes those teachers who, in the years mentioned, offered such students technical instruction in subjects lying outside the curriculum of the college; and this in turn is followed by a complete list of the separate Faculty of Applied Science, dating from 1899.
